GALCO CAPITAL

## Executive Summary

### Business Overview

Our business consists of the creation of a multifunctional and covered shopping center, which is distinguished by integrating four key services in the same space: a co-working area, a cafeteria-bar, a feminine beauty space and a yoga studio. The combination of these elements seeks to satisfy the diverse needs of our clientele, offering a versatile and attractive environment that encourages productivity, well-being and socialization.

### Concept and Design

The shopping center will be characterized by a minimalist and bright design, with large, well-lit spaces that promote an atmosphere of tranquility and comfort. This approach not only improves the user experience, but also maximizes the functionality of the space, allowing for a seamless transition between different areas.

### Business Model

Our business model is based on three fundamental pillars:

1. **Rental of Spaces to Third Parties:** The center spaces will be rented to third parties, allowing efficient and diversified management of the services offered. This includes both the co-working area and the cafe-bar, the female beauty space and the yoga studio.
2. **Administration and Supply:** We will be in charge of fiscal administration and supply of inputs for all businesses operating within the center. This centralized management will ensure a coherent and efficient operation, reducing costs and improving service quality.
3. **Monthly Subscription for Co-working:** We will offer a monthly subscription to access the co-working space, providing different plans that adapt to the needs of freelancers, small businesses and growing work teams.

### Cafeteria Offer

The cafeteria-bar will be distinguished by a varied offer adaptable to different times of the day, from healthy breakfasts and light lunches to drinks and snacks for the afternoon. This flexibility will allow it to attract a wide range of clients, from professionals looking for a place to work to visitors looking to relax and socialize.

## Aim

Our goal is to create a dynamic and multifunctional space that becomes a point of reference in the community, offering high quality services and fostering an environment of collaboration and well-being.

With an innovative approach and efficient management, our shopping center has the potential to redefine the shopping and work experience, attracting a diverse and loyal clientele. The combination of co-working, cafe-bar, beauty space and yoga studio in a harmonious and well-designed environment promises to not only meet, but exceed the expectations of our clients.

## Market Analysis

### Market Trends

1. **Increase in Remote Work:** The COVID-19 pandemic has accelerated the adoption of remote work, establishing a new normal in many industries. Companies of all sizes are implementing flexible work policies, which has significantly increased demand for co-working spaces. These spaces provide an ideal solution for freelancers, small businesses and remote teams looking for a professional environment without the costs associated with a traditional office.
2. **Wellbeing and Health:** Awareness about the importance of well-being and health is on the rise. People are investing more time and resources in activities that promote their physical and mental well-being. Yoga studios and beauty services are sectors that have seen a steady increase in demand as they offer effective ways to reduce stress and improve quality of life. This growing interest in self-care is reflected in the proliferation of establishments dedicated to these activities in urban areas.
3. **Varied Gastronomy:** Today's consumers seek unique and varied gastronomic experiences. This trend is manifested in the popularity of cafes and bars that offer diversified menus, adapted to different times of the day and that include healthy, vegan and gourmet options. The demand for culinary offerings that not only satisfy hunger, but also provide a sensory and social experience, is driving innovation in the restaurant sector.

### Competition Analysis

In the market analysis, it is essential to consider the existing competition in each of the segments that make up our shopping center:

1. **Co-working spaces:** Major competitors include international co-working chains like WeWork, as well as local independent spaces. Our focus on integrating multiple services under one roof and offering flexible monthly subscriptions will differentiate us by providing significant added value.
2. **Yoga Studios and Beauty Spaces:** There are numerous yoga studios and beauty salons, but few offer the convenience of being in a multifunctional environment. Our value proposition lies in the synergy between physical and mental well-being, allowing clients to easily access both services in one place.

3. **Cafes and Bars:** Competition in this sector is intense, with numerous options available to consumers. However, our focus on a varied and adaptable gastronomic offer, together with the creation of a welcoming and minimalist environment, will allow us to capture a niche market interested in differentiated culinary experiences.

Market analysis reveals that our shopping center is well positioned to take advantage of emerging trends. Demand for co-working spaces is on the rise due to remote working, while interest in wellness and health is driving the need for yoga studios and beauty services. At the same time, the pursuit of varied dining experiences offers a significant opportunity for our café-bar. The combination of these elements in a carefully designed environment allows us to meet the changing needs of urban consumers, positioning us as a preferred destination for work, wellness and socialization.
